PARKING INSIDER

Electric vehicles charge ahead - the opportunities for parking

Change is coming and the future that we didn't expect ten years ago is now. The cost of manufacturing electric vehicles is anticipated to fall dramatically, and much faster than most people realise. There is barely a carmaker out there that doesn't have plans to produce an electric car in the near future. But how do parking operators take advantage of this, if at

Cyber security panel to look at data protection

Malware attacks are increasing in volume, in fact about 99% of our computers are vulnerable to cyber attacks of some type. So how do we gain knowledge and understanding of potential threats and challenges, and the concepts and practices applied in cyber security? Join our panel of experts for a two way session in Melbourne this month with case studies and a Q&A session. [Find out more...](#)

Cutting-edge technology to block parking freeloaders

LA transport giant, Metro, is linking its new parking operation to its transit TAP card to keep parking spaces for commuters using the network, rather than non-transit users taking parking resources to avoid paying up to \$5 an hour for parking elsewhere. Metro is using cutting-edge technology to reclaim its Park & Ride parking spaces for transit riders. [Read more...](#)

Future trends in car park occupancy and parking data and analytics

In a newly released podcast from the PACE 2016 series, Cristina Lynn discusses trends in demand for parking across different industry sectors and evaluates potential for repurposing parking structures and facilities to other uses. Plus, a parking panel with members from the City of Brisbane, ADVAM and Bistech talk about the opportunities for using and analysing data to better predict what your customers are purchasing. [Log into the podcast page to start listening...](#)

Brisbane's the Myer Centre car park goes digital

In partnership with CV Media & Design, the Myer Centre Car Park in Brisbane is the latest location to step in the digital direction. Owned and managed by Vicinity Centres, one of Australia's leading retail property groups, employing digital parking technology was a natural progression for the innovative company..[Read more...](#)

Coles selects Smart Parking to transform parking at new supermarkets

Australian brand, Coles Supermarkets has chosen to work with Smart Parking to make parking easier and more convenient for its customers at four new supermarkets nationally. Smart Parking has installed its innovative guidance technology to help direct drivers to available car parking spaces quickly and easily...[Read more....](#)

The future of vehicle safety lies with autonomous features

The need to build consumer, industry and regulatory confidence in autonomous vehicle technologies was the key message from Australasia's leading vehicle safety advocate, ANCAP, at the House of Representatives Public Hearing into the social impacts of driverless vehicles. ANCAP Chief Executive Officer, Mr James Goodwin, gave evidence at the Hearing held at Parliament House... [Read more...](#)

Funding grants for women's leadership development

Women & Leadership Australia (WLA) is administering a national initiative to support the development of female leaders across Australia. The initiative is providing women with grants to enable participation in a range of leadership development programs. The leadership development programs are part-time and delivered nationally via WLA's
