

Parking advocacy continues during the pandemic

Parking Australia has continued to represent the industry to the federal and state governments, during this pandemic, on a range of issues. While lockdown restrictions differ in each state, there are only a minority of locations where car park usage has recovered to sustainable levels, especially in the larger capital cities. There is little doubt that the pandemic has, and will, change the way Australians travel and work. Many predict that people will work from home more often, thus reducing the number of vehicles, and in turn reducing the number of motorists parking. [Read more...](#)

Parking Australia CEO calls for removal of FBT

EasyPark receives the Award "Best Managed Companies"

Parking Australia CEO Stuart Norman says if fringe benefits taxes on parking are removed, it would take away the disincentive for businesses across the country to be able to get their staff to work in a COVIDSafe manner. The parking industry is...
