Featuring four parking sector experts in their field as

PARKING INSIDER

Chief Executive's Message

Parking Australia members who have renewed their membership will now receive a membership card with a QR code that provides access to exclusive member benefits, research, podcasts and invitations to events. Just as a reminder, membership of PA allows for an **UNLIMITED** number of subscriptions as part of the organisation's membership. This month the [QR code features research](#) from both PA and National Retailers Association members, regarding the impacts of parking overstay on retail businesses. The results are quite astounding and further supports the reason why we developed the [Accredited Operator Scheme](#) which is underpinned by a [Code of Practice for Enforcement on Private Land](#). There has been a lot of media over the last few months regarding Hospital Parking charges, so PA is forming a working group to assess the possibility of developing a Code of

they each present on the "now" and the "future" of their organisation. Followed by networking drinks. Hosted by Scentre Group (Westfield).

**Westfield seeking
Casual Customer
Service
Representatives**

Westfield (Scentre Group) are currently seeking Casual

this initiative. PA has also raised its profile in the last six months through more media engagement with opinion being sought by some of the major transport writers keen to learn more about parking technology and our policies. With rumblings about a parking levy being introduced in Brisbane it is paramount for PA to advocate that a parking levy to fund infrastructure developments is both discriminatory and detrimental to the parking industry and motorists, let alone businesses that are impacted if the result means parking price increases. [Email me your thoughts](#) about the possible parking levy in Brisbane. Lastly I encourage you to visit the [Parking Industry Awards](#) page and enter a nomination. The team of judges will be announced next week and with only about 22 working days left until submissions close there is no time like the present to at least start your application. Best of luck to all nominees!

Smart cities: does this mean more transport disruptions?

A plethora of new and personalised ways of getting around cities are emerging - electric bikes, motorised scooters, electric vehicles, car sharing and re-interpretations of the taxi by Uber. How might we realise the potential of these transport disruptions? How does the combination of culture, regulation and technology shape sustainable transport futures? [Read more...](#)

Parking success without parking excess

China's cities have serious parking problems and most of them blame shortage. Rapid increases in urban car ownership since the year 2000 has left many streets and residential areas with parking chaos, especially in older parts of town. Convenient parking is very often more than 100% full, causing search traffic and illegal parking on streets, on sidewalks and on public spaces. [Read more...](#)

What role do human factors play in the design & operation of parking facilities?

The Australian Road Research Board (ARRB Group) has initiated an innovative, industry-first, program of research, education and consulting activities on human factors in parking that are aimed at improving the safety, ease of use, and efficiency of use of parking facilities in Australia. ARRB will be presenting their findings at PACE 2016 in November. [Read more...](#)

Customer Service Representatives with a view to permanent opportunities for their National Parking Operations Centre in Parramatta CBD.

LATEST MEMBER RESOURCE

Are your parking facilities being fully optimised?

Parking Australia recently partnered with our colleagues at the National Retailers Association to survey some of their members, as well as our own membership, to try and determine whether parking facilities are being used in the most effective manner.

What maths can teach us about how to design the perfect car park

There can be few things as frustrating as being stuck in a car park for four hours on a scorching Sunday afternoon; yet this was the unhappy fate of shoppers at a new multi-storey grid car park at an IKEA store in Reading, UK. The delays were caused by a few factors, including a particularly busy adjacent road, the popularity of the store's opening weekend and the convergence of vehicles on a single exit ramp. [Read more...](#)

Duncan Solutions undergoes brand refresh

Having been in operation for over 80 years, Duncan Solutions has built up an enviable reputation. Though best known as an innovative parking meter company, the truth is, the Duncan Solutions of today is a cutting-edge, forward-thinking business dedicated to making Australia and New Zealand's cities smarter.

Pokemon Go no laughing matter for employers

Pokemon Go has taken the world by storm with over 100 million downloads to date. But Google 'Pokemon accidents' and you'll quickly see that this popular augmented reality game is no laughing matter for employers. It seems plenty of people have injured themselves - and some have even died - while being completely engrossed in the game and paying little attention to their surroundings. [Read more...](#)

Awards submissions due end of September

[Transit Supportive Parking Policies and Programs \(Transportation Research Board 2016\)](#)

An increasing number of transit agencies have begun to think carefully about how their parking policies encourage or discourage transit use and how to efficiently use resources engaged for parking.

Care Park platinum sponsor for PACE

Leading Australian car parking company Care Park is the PACE 2016 platinum sponsor. With an almost 30 year history in the parking industry Care Park has grown from humble beginnings to now being a leading car park provider across Australia, New Zealand and Malaysia. The company's portfolio of car parks continues to grow and expansion will continue in the next two years into emerging markets across South East Asia and Europe. [Read more...](#)

Improving cities: one step at a time

It's well known that Australia is one of the most urbanised countries, with many state governments fast-tracking development and population growth promising to change the face of our major cities in coming decades. So against this backdrop, how 'walkable' will our cities be? According to visiting American city planner and architectural designer Jeff Speck, a 'walkable city' is more healthy...[Read more...](#)

Big data and digital signage driving the parking industry

Digital technology is driving rapid change in the car-parking industry - electric cars, driverless cars, car sharing, app-based searching, booking, digital payment systems - the list could go on. The two key areas where digital technology is changing the car-parking industry landscape are the use of Big Data and the use of digital screens to enhance the customer experience.

Updates to member privacy

Parking Australia has recently changed the settings for our online Suppliers Directory. Contact information for individuals at companies is now reserved for member only access and requires log in. Publicly the directory reveals only company name, description and website address. If you would prefer not to be featured in the online suppliers guide, you can remove your profile entirely by logging in at the [members profile page](#), clicking privacy and unchecking 'show profile to others'. Please email Parking Australia for assistance with this process paa@parking.asn.au.

Developing high potential women leaders

Women & Leadership Australia (WLA) has launched a new flagship program designed to develop mid to senior level women and prepare them for advancement into executive leadership. A national scholarship initiative will be administered by WLA to support this launch. \$4,000 development scholarships are now being awarded to female leaders across the country...
