

Message from the CEO - Stuart Norman

Parking Australia held its first networking event for 2019 in Sydney and it was a pleasure to meet the members who attended. The event solidified in my mind that the industry is poised for rapid change with many Parking Australia members being at the forefront of that change.

On the weekend I attended a BBQ and was asked, 'How's the new job was going?'. One of the people in the conversation was scoffing that the parking industry has a representative body. In reply I said that the

parking industry is a billion-dollar plus industry and as such said, 'Why wouldn't it have a representative body?'. [Read more....](#)

NSW Government Minister speaks at Sydney parking event

Parking Australia's first event of 2019 got underway on 12 February, with an address from the Hon Shayne Mallard MLC, who attended to speak about the NSW Government's policies relating to parking. The Minister's address was followed by...

THE BIN PARKING MINS!

HOW ONE SILLY LITTLE RULE IS RUINING AUCKLAND.

WHY IS IT A "BAD" RULE?

1. RIDICULOUS COST

Off-street parking costs avg \$50,000 per park.

2. POOR USE OF URBAN SPACE

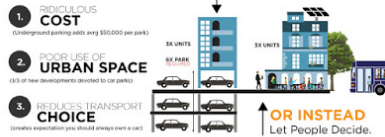

1/3 of new developments converted to car parks.

3. REDUCES TRANSPORT CHOICE

Greater employment growth always over a car.

—THE BAD RULE—

"For every residential unit there shall be at least two off-street parking spaces provided"

COUNCIL IS DECIDING ON INCLUDING THIS RULE IN THE UNITARY PLAN.

They probably don't think anyone cares about it. We sure do.

THIS WEEK

#BIN THE PARKING MINS

Let them know...

Car parks not always used

Car parks used and 2 turned into a pop-up farm

How much is your car space worth?

Urban car parks make up a large part of the urban fabric and many sit unused creating heat islands in cities. Biofilita believes that unused car parks can be valuable local urban farms.
