

Alliance for Parking Data Standards & Park'nPay

The [Alliance for Parking Data Standards](#) will release the finalised Version 2.0 of the global parking standard later this month, following a public review of the draft standard in the second half of 2019. This ground-breaking initiative will establish a common language for data elements and definitions in the parking, transportation, and mobility sectors – streamlining innovation, progress and technology in our industry – and beyond. Parking Australia is looking to hold a webinar in the coming months to inform members of what the standards may mean for them. [Read more....](#)

WA Government to ban wheel clamping

The West Australian Premier, Mark McGowan, has called wheel clamping contractors in his state "thugs and bullies", referring to the way that contractors target people as unacceptable and un-Australian. In response the WA Government is...

Self-driving cars will not fix our transportation woes

The prevailing belief is that a system of self-driving cars will solve several environmental and social problems without us needing to worry. Unfortunately, this future will almost certainly never come to pass.
