PARKING INSIDER

Chief Executive's Message

Are you struggling to keep up with social media and newsletters? I know I am and as an association whose mantra is about keeping our members informed, I am challenged by the best way to do this. We currently have a raft of **PODCASTS** on the members portal that are great for when you are commuting. We produce a monthly newsletter (this one) and a weekly Parking Insider Express, which is a wrap up of parking stories nationally and across the globe, however I was recently at a video marketing seminar and have learnt that before reading any text 60% of visitors will watch a video! The average user spends about 17 minutes a month watching online ads! So in the coming weeks we will be trialing some short video updates on topics that are trending. Which leads me to remind you of the trending topics [#parking](#)

NEW TO THE E-LIBRARY

Re(inventing) the Wheel
(Chartered Institute of
Logistics & Transport, UK,
2017)

delegate sessions at OUTLOOK so I encourage to vote or add new topics. This weeks posts:

Will self driving cars push parking underground?? and Is parking a solution to congestion?

I am pleased to announce that joining our panel at **OUTLOOK** on the topic of "electric vehicles charge ahead" is **Craig Norris from Mitsubishi Motors Australia Limited**. Craig is the National E Mobility Manager who is also on the EV Council and he will share why the parking industry needs to be prepared for the next few years in this space. Is enough being done by our state governments to support the parking industry to take up "new industries"? A new **Bill unveiled by the Queen** may require EV charging points to be fitted to services and fuel stations throughout the UK. #parkingtrends2017

What's trending in parking this week?

Help us to uncover the latest trends in parking by sharing your parking interests or hot topics in parking, and vote for the topics that you would like to know more about. Results will be used to help us identify relevant content for our members online and at PA events.

Government hoards cash meant for commuter car parks

The Berejiklian Government is failing to spend money upgrading car parks at train stations despite raking in tens of millions of dollars from a tax raised on parking spaces. According to Shadow Treasurer, Ryan Park, budget figures show that that the Treasurer and the Transport Minister are quite happy to take the money from taxpayers but not spend it, despite thousand of commuters being forced to drive or walk long distances to the nearest train station. [Public sector automation:](#)

If you thought you'd run out of time to submit your entry for the 2017 Parking Industry Awards, then this is your lucky day, as the call for nominations has been extended until Wednesday 5 July. We won't be able to extend this again, as we have the panel of judges waiting to review, certificates to be made and crystal awards to be etched! [Start your entry here...](#)

On-street parking fees despite zero public transport?

Can on-street parking fees really help places with poor public transport? Australian transport policy researcher, adviser, writer and trainer, Paul Barter, discusses this issue following a recent trip to Pune in India, where they have extreme parking problems and the Pune Municipal Corporation (PMC) has a new and progressive draft parking policy awaiting approval. [Read more...](#)

EasyMile's EZ10 electric driverless shuttle launches in Kaohsiung city

On 7 June 2017 EasyMile and Taiwan's tech consulting firm, 7Starlake, officially launched the EZ10 electric driverless shuttle at a press conference in Taiwan's Kaohsiung city. Kaohsiung city mayor, Chen Chu, also participated in the launch and took a test ride in the EZ10 driverless shuttle. [Read more...](#)

We must plan the driverless city to avoid being hostage to the technology revolution

Trials of autonomous cars and buses have begun on the streets of Australian cities. Communications companies are moving to deploy the lasers, cameras and centimetre-perfect GPS that will enable a vehicle to navigate the streets of your town or city without a driver. Most research and commentary is telling us how the new machines will work, but not how they might shape our cities. [Read more...](#)

City of Hamilton set to unveil the deployment of bay sensor technology

Working in partnership with Arthur D. Riley Ltd, Smart Parking, the global parking technology company has won a contract for the supply and maintenance of bay sensor technology for approximately 945 parking bays in the City of Hamilton. Located in the North Island, Hamilton is the fourth most populous city in New Zealand. [Read more...](#)

Auckland Airport selects ADVAM to provide contactless payments

Auckland Airport has worked with ADVAM for some time providing an automated solution for the Ground Transport service. With this solution in place, the focus moved to passenger parking and how the experience could be improved for its customers. Auckland Airport is a vital transport hub for both people and cargo, connecting Auckland to New Zealand and New Zealand to the world. [Read more...](#)
