

Message from the CEO - Stuart Norman

When federal governments start making announcements about funding additional car parking at public transport interchanges, then it's a sure sign an election is around the corner. However, they are not alone with the Labor opposition also making an announcement providing monies for car parking at train stations. These announcements are easily made by federal governments as it is not their land and still requires the state governments to agree to the projects. [Read more....](#)

Call for Presentations

Parking Australia invites experienced speakers to present sessions at OUTLOOK 2019. This year's conference will be held from the 27 - 29 November 2019 at Crown Melbourne. We are seeking speakers who will bring innovative thinking...

Just how 'city smart' are local governments in Queensland?

Many places around the world claim to be a " smart city", but what that means is often unclear. A smart city is widely seen as an urban area that uses technology to enhance performance and the quality of its services.
