

EV Smart Charging Trial

NOVEMBER 2022

AGL EV Smart Charging Trial

EV Smart Charging Trial

- SA Government (Dept Energy Mining) funding
- 18 x EV Chargers across 3 sites
 - ADE014 City West
 - ADE050 Lot Fourteen
 - ADE052 Flinders Link
- (Paid) Reserved/Subscription
- Go Live/Media launch October

Trial Objectives

- Gather trial data on customer behaviour and commercial model

New Electric Vehicle charging stations launch in Adelaide CBD car parks

Electric vehicle drivers who park in Adelaide's CBD have more options to power up, thanks to an innovative trial being launched today at 1pm at Wilson Parking, City West, 189 Hindley Street.

Minister for Energy and Mining Tom Koutsantonis, AGL General Manager Emerging Business, Bruce Hardy and Wilson Parking Chief Technology Officer Paul Sidwell launched the first of 18 EV charging systems at the Wilson Parking City West car park as part of the EV Smart Charging Trials.

The EV Smart Charging Trials will support the electrification of South Australia's transport fleet, playing a vital role in the overall transition from carbon-emitting technologies to a greener, cleaner future.

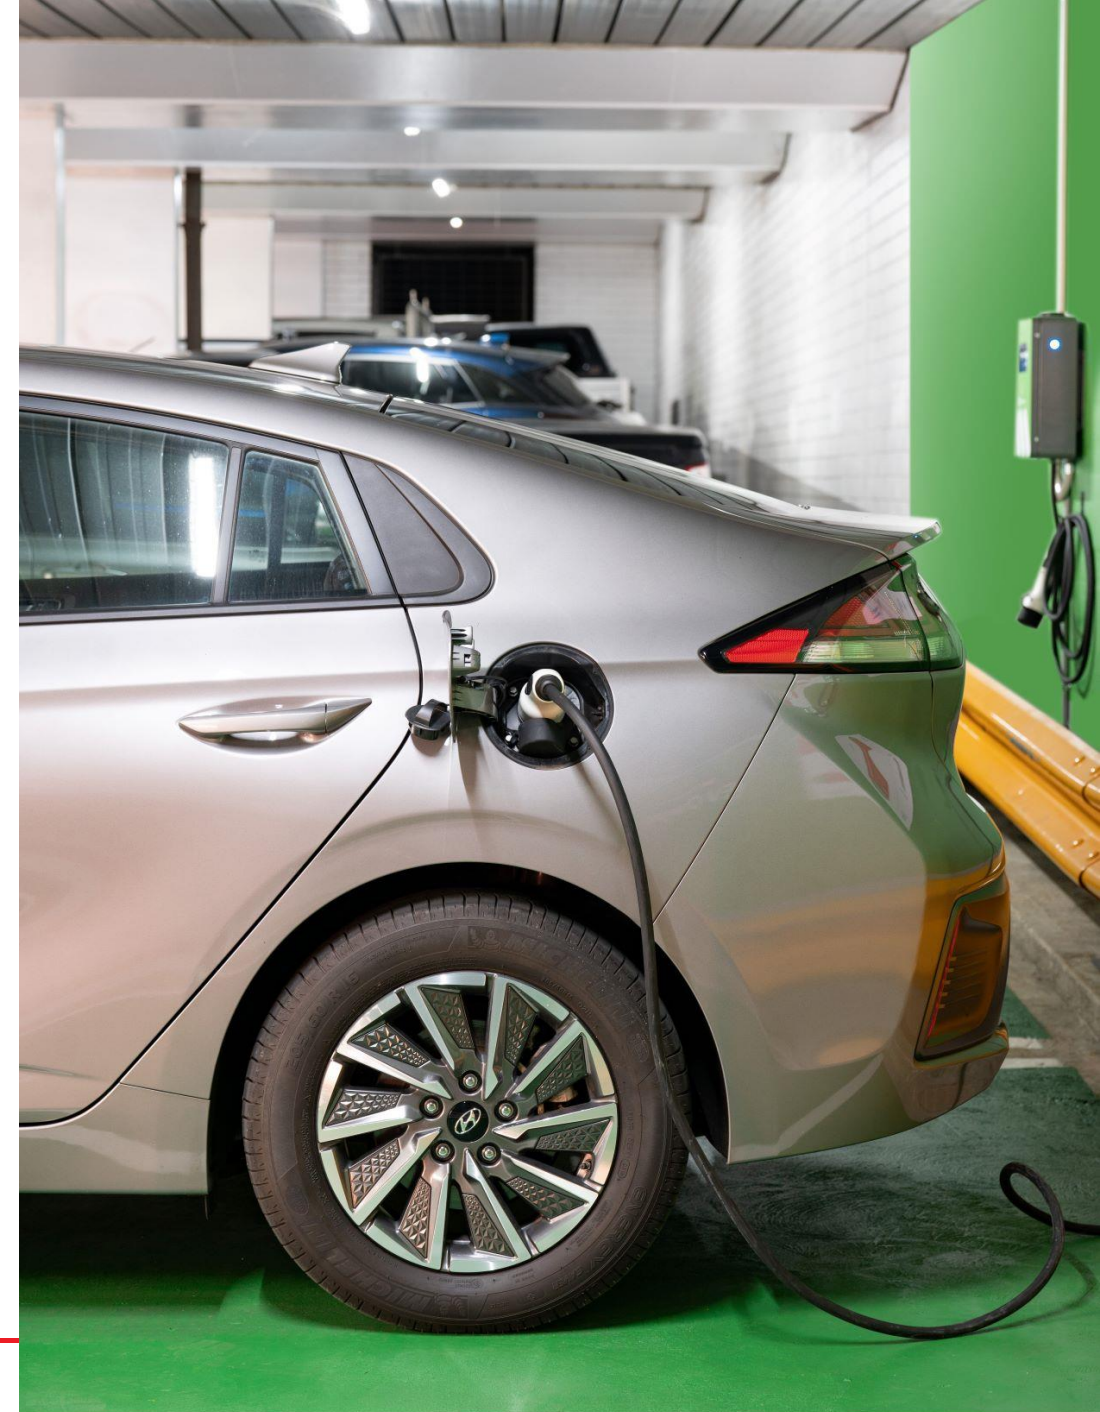

Key Learnings

Considerations

- Use-case
- Customer segments
- AC vs DC
- Site selection – infrastructure suitability
- Physical installation locations
- Signage
- Delivery partners

Key Learnings

- Car park infrastructure is the most significant hurdle
- Use-case and commercial model definition is important
- Landlords are a dependency
